

I. YKK Group overview

With YKK Corporation as its parent company, the YKK Group's worldwide operation are based on the twin pillars of fastening products and architectural products. YKK Architectural Products Inc. performs architectural work under the brand name "YKKap", in close partnership with other YKK AP Group companies. Representing the core of YKK Group technologies, Machinery and Engineering division support the vertically integrated production system for our fastening and architectural products. The Research

and Development division conducts advanced research into materials and technologies closely tied to these operations.
